DETAILED ACTION

This office action is a response to the amendment filed on 11/17/2005.

Comments

1. Since generic claim 1 is allowable, claims 9-13, 16 and 22, directed to the method for welding together at least two components of the disk drive head suspension, previously restricted from the election of species, are now subject to bring rejoined. Claims 1-25 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Linder on 1/25/2006.

The application has been amended as follows:

IN THE CLAIM

Re. Claim1: After the phrase "first component" as recited in line 3, insert a phrase of --of the disk drive head suspension--.

After the phrase "second component" as recited in lines 5-6, insert a phrase of --of the disk drive head suspension--.

The non-elect claims 26-34 are cancelled.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as an edge welding a first component and second component of the disk drive head suspension. The closest reference Wu et al. (US PT. 6,417,995) teaches a process of welding a first component and second component of the disk drive head suspension at (78,80,82). However, Wu et al. fail to teach a process of edge welding, which is that the first major surface of the first component is overlapped with the surface of the second component and the edge surface extends beyond the edge surface into the second major surface of the first component and into the surface of the second component. The welding process of Wu et al. is to melt the load beam and the flexure for attaching the load beam to the flexure. Therefore, it would not be obvious to modify Wu et al. by edge welding between the load beam and the flexure to fixed each other, since doing so would destroy the structure of disk drive head suspension of Wu et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

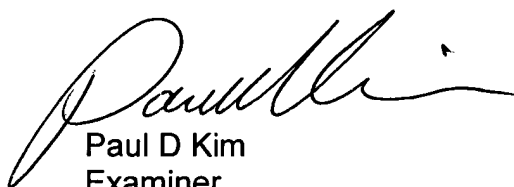

4. Claims 1-25 are allowed.
